

## About the project

Our project is related to dental health. We want the students to get into the habit of brushing their tooth regularly. At the beginning of the project we will inform the families about our project. We will emphasize that their supports are important in this project.

To make toothbrushing habit gain to our students ;

We will invite dentists to our classes. They will inform our students about the importance of teeth health .They will show how to brush teeth properly. This process will be an important milestone at the beginning of our project. After visiting by dentists our students will brush their teeth once a day at school. The teachers will observe their students while they brush their teeth. Besides these we will make different activities that our students will enjoy.

### **AIMS**

Our aim is to make our students realize the importance of dental health.

Our second aim is to make our students gain a brushing habit thanks to the activities at school.

And we expect them to win a lifelong toothbrushing habit.

### **WORK PROCESS**

We plan to continue this project for six months. The partners of the project will cooperate with each other every month. We want to get the supports of the families during the project. We will invite a dentist to school. The dentist will inform the students about the dental health and teach them proper toothbrushing techniques. The students will bring their toothpaste and toothbrush to the school and they will brush their teeth under the teacher supervision.

### **EXPECTED RESULTS**

We expect our students to be aware of their dental health. We also expect them to win toothbrushing habits and to continue this habit throughout their lives.
